Learning stories reflection sheet

Insights and inspiration I gained:

What strategies and ideas could I /my team implement and use?

What are my priorities?

What do I require (who/what) to support me with implementing these strategies and ideas?

Who do I require support from to do this?

What resources will we need?

What challenges, barriers or issues do I need to consider before implementing these change(s)?

When will I complete this, and how will I know I have achieved success?

What questions do I have that require further research?
